**A First Course in Topology: Continuity and Dimension (Student Mathematical Library)** John McCleary

How many dimensions does our universe require for a comprehensive physical description? In 1905, Poincaré argued philosophically about the necessity of the three familiar dimensions, while recent research is based on 11 dimensions or even 23 dimensions. The notion of dimension itself presented a basic problem to the pioneers of topology. Cantor asked if dimension was a topological feature of Euclidean space. To answer this question, some important topological ideas were introduced by Brouwer, giving shape to a subject whose development dominated the twentieth century. The basic notions in topology are varied and a comprehensive grounding in point-set topology, the definition and use of the fundamental group, and the beginnings of homology theory requires considerable time. The goal of this book is a focused introduction through these classical topics, aiming throughout at the classical result of the Invariance of Dimension. This text is based on the author's course given at Vassar College and is intended for advanced undergraduate students. It is suitable for a semester-long course on topology for students who have studied real analysis and linear algebra. It is also a good choice for a capstone course, senior seminar, or independent study.

### **From reader reviews:**

#### **Jason Urso:**

Nowadays reading books become more and more than want or need but also work as a life style. This reading practice give you lot of advantages. The huge benefits you got of course the knowledge your information inside the book in which improve your knowledge and information. The info you get based on what kind of e-book you read, if you want get more knowledge just go with training books but if you want experience happy read one together with theme for entertaining including comic or novel. Typically the A First Course in Topology: Continuity and Dimension (Student Mathematical Library) is kind of e-book which is giving the reader unpredictable experience.

#### **Gary Lopez:**

The reserve untitled A First Course in Topology: Continuity and Dimension (Student Mathematical Library) is the publication that recommended to you to see. You can see the quality of the guide content that will be shown to an individual. The language that writer use to explained their ideas are easily to understand. The author was did a lot of analysis when write the book, so the information that they share to you personally is absolutely accurate. You also could possibly get the e-book of A First Course in Topology: Continuity and Dimension (Student Mathematical Library) from the publisher to make you much more enjoy free time.

#### **Anthony Hubbard:**

Do you have something that you want such as book? The publication lovers usually prefer to choose book like comic, quick story and the biggest an example may be novel. Now, why not striving A First Course in Topology: Continuity and Dimension (Student Mathematical Library) that give your entertainment preference will be satisfied by reading this book. Reading behavior all over the world can be said as the opportunity for people to know world much better then how they react when it comes to the world. It can't be stated constantly that reading practice only for the geeky particular person but for all of you who wants to possibly be success person. So , for all of you who want to start studying as your good habit, you may pick A First Course in Topology: Continuity and Dimension (Student Mathematical Library) become your own personal starter.

#### **Kevin Mabry:**

A lot of book has printed but it differs. You can get it by world wide web on social media. You can choose the best book for you, science, comic, novel, or whatever by searching from it. It is named of book A First Course in Topology: Continuity and Dimension (Student Mathematical Library). You can include your knowledge by it. Without leaving behind the printed book, it could possibly add your knowledge and make anyone happier to read. It is most crucial that, you must aware about book. It can bring you from one destination for a other place.
