Pressure Sores: The 'Nurse you're killing me' series Catherine A. Sharp

Learn How a Unique Model of Care really can PREVENT Pressure sores.

By following easy, common sense yet unique Tips that I am going to tell you about you can have a facility where, with reasonable care, NO patients will develop pressure sores. You don't need to be an expert...anyone can assess the risk of a patient developing a pressure injury very quickly without using a time-consuming numerical tool...and so will be able to intervene just as quickly to prevent the pressure sores.

Family members, Physiotherapists, Assistants in Nursing, Personal Care Assistants, Medical Students, Registered Nurses and Consultants can do it.

So what have you been doing to date?

Let me guess...

You've already tried every 'risk assessment tool, modified risk assessment tool, air mattress, wound care product' that's come along and nothing has worked to help you prevent pressure sores, right?

After years of seeing so many healthcare workers frustrated and upset because patients were still developing pressure sores --wasting their money on worthless mattresses...and writing reports for the Courts for lawyers whose clients have developed pressure sores I decided it was time to put together my own unique system to solve this problem.

What I did was put together an innovative scientifically-based system that will prevent pressure sores in patients of all ages.

I have written this book with my two hats on: as a Pressure Injury Prevention / Wound Care / Infection Control Consultant and as an Expert Witness Nurse Consultant in Australia writing reports for for the Courts for lawyers with clients that have developed pressure sores.
