Algebraic Number Theory (Graduate Texts in Mathematics)

Serge Lang

Algebraic Number Theory (Graduate Texts in Mathematics) Serge Lang

This is a second edition of Lang's well-known textbook. It covers all of the basic material of classical algebraic number theory, giving the student the background necessary for the study of further topics in algebraic number theory, such as cyclotomic fields, or modular forms.

"Lang's books are always of great value for the graduate student and the research mathematician. This updated edition of Algebraic number theory is no exception."—MATHEMATICAL REVIEWS

From reader reviews:

Janette Collins:

Book is written, printed, or descriptive for everything. You can learn everything you want by a book. Book has a different type. As we know that book is important thing to bring us around the world. Alongside that you can your reading talent was fluently. A guide Algebraic Number Theory (Graduate Texts in Mathematics) will make you to become smarter. You can feel a lot more confidence if you can know about every little thing. But some of you think which open or reading a new book make you bored. It is not necessarily make you fun. Why they could be thought like that? Have you trying to find best book or appropriate book with you?

Anna Humphrey:

What do you think of book? It is just for students as they are still students or that for all people in the world, what best subject for that? Simply you can be answered for that problem above. Every person has distinct personality and hobby for every other. Don't to be pressured someone or something that they don't desire do that. You must know how great as well as important the book Algebraic Number Theory (Graduate Texts in Mathematics). All type of book can you see on many solutions. You can look for the internet solutions or other social media.

Jessica Henriquez:

The guide untitled Algebraic Number Theory (Graduate Texts in Mathematics) is the guide that recommended to you you just read. You can see the quality of the publication content that will be shown to anyone. The language that creator use to explained their ideas are easily to understand. The copy writer was did a lot of investigation when write the book, to ensure the information that they share to you is absolutely accurate. You also could get the e-book of Algebraic Number Theory (Graduate Texts in Mathematics) from the publisher to make you much more enjoy free time.

Michael Rahn:

The actual book Algebraic Number Theory (Graduate Texts in Mathematics) has a lot details on it. So when you read this book you can get a lot of gain. The book was written by the very famous author. The author makes some research just before write this book. That book very easy to read you can obtain the point easily after perusing this book.
