Happiness And Money

Are you tired of hearing the saying “Money doesn’t buy happiness?” Especially when you don’t have any money or at least believe you don’t. It is easy to get caught up feeling like you are a victim of a low paying job and piles of bills.

This book explores how the saying “Money doesn’t buy happiness” has some truth to it but also how to actually get the money you want. Money may not buy happiness in many senses, but not having to worry about money makes a lot of people happy.

Money Mindset

If, every time you hear someone got a raise or made more money, you get jealous and hate on them it indicates you are mentally preventing yourself from making more money. You can think and grow rich as numerous rich people can attest to.

What we think about we become. Any wealthy person will tell you that and the fact they never think like a poor person. While so many of us are whining about how bad we have it, they are out there getting what they want.

We all have the same amount of time in the day to make money, but if you wake up thinking today you will just go more into debt then you are right. Think rich, be rich.

Budgeting Your Money

There is a bank slogan that says, “You are richer than you think” and the reality is that is true. Most people have money just leaking out of their pockets monthly and have no idea. It takes sitting down and doing just a bit of legwork to discover where the money is disappearing to.

Then you have to actually make a budget and stick with it. Remember you are not trying to find happiness through money but the freedom to be able to do what you want financially. Our problems are typically internally driven which is why some people who win the lottery end up broke again anyway.

They got rich and then thought themselves broke. You need to understand how you are spending your money

in order to understand how you should be spending your money.

Money Management

Inside you will discover some startling numbers on just exactly how much you could be saving per year with some simple tweaks. This isn't a book about minimalism or being super thrifty but one that explores how the way you think about money is controlling how you are spending your money.

Did you know that you spend more when you have less? People will tend to make more impulse buys when cash is low because they feel defeated and hopeless. They are looking for comfort in their purchases and then at the end of the month have serious buyer's remorse.

This is not some financial book either that has you filling out formulas and charts of your spending. It is very simple to keep track of what you spend and then see if it is more than you make. Just use an app for that.

No, this book is about the mental game of money management and discovering how to be happy while getting rich. Not all rich people are happy and not all poor people are unhappy so there is obviously a secret to happiness that doesn't just involve money.
