Unleashing the Potential of Renewable Energy in India (World Bank Studies) Gevorg Sargsyan, Mikul Bhatia, Sudeshna Ghosh Banerjee, Krishnan Raghunathan, Ruchi Soni

India has 150GW of renewable energy potential, about half in the form of small hydropower, biomass, and wind and half in solar, cogeneration, and waste-to-energy. Developing renewable energy can help India increase its energy security, reduce the adverse impacts on the local environment, lower its carbon intensity, contribute to more balanced regional development, and realize its aspirations for leadership in high-technology industries. This study aims to answer critical questions on why renewable energy development is relevant in Indian context, on how much development is economically feasible, and on what needs to be done to realize the potential. The Report is based on data from nearly 180 wind, biomass, and small hydropower projects in 20 states, as well as information from the Ministry of New and Renewable Energy (MNRE) and the Central Electricity Regulatory Commission (CERC). The Report suggests that about 3GW of renewable energy – all from small hydropower is economically feasible, when the avoided cost of coal-based generation of Rs 3.08/kWh is considered. About 59GW of renewable energy in wind, biomass, and small hydropower is available at less than Rs 5/kWh. The entire cumulative capacity of 68GW in these three technologies can be harnessed at less than Rs 6/kWh. About 62GW?90 percent of cumulative renewable capacity in wind, biomass, and small hydropower?is economically feasible when the environmental premiums on coal are brought into consideration. Realizing the need to bridge this gap, the government has set an ambitious target of installing at least 40GW of additional capacity of renewables in the next 10 years. India has made tremendous strides in establishing overarching policy framework and institutions to bring renewable in the mainstream of energy mix, but significant financial, infrastructure and regulatory barriers to renewable energy development remain which the report sheds light on and suggests possible solutions.

From reader reviews:

Joann Hamilton:

Reading a e-book tends to be new life style with this era globalization. With reading through you can get a lot of information that can give you benefit in your life. Having book everyone in this world could share their idea. Textbooks can also inspire a lot of people. Plenty of author can inspire their own reader with their story or maybe their experience. Not only situation that share in the books. But also they write about the data about something that you need example of this. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors in this world always try to improve their skill in writing, they also doing some study before they write to their book. One of them is this Unleashing the Potential of Renewable Energy in India (World Bank Studies).

Gayle Skinner:

The reserve with title Unleashing the Potential of Renewable Energy in India (World Bank Studies) has a lot of information that you can find out it. You can get a lot of advantage after read this book. That book exist new know-how the information that exist in this e-book represented the condition of the world right now. That is important to yo7u to learn how the improvement of the world. This particular book will bring you in new era of the the positive effect. You can read the e-book on your own smart phone, so you can read it anywhere you want.

Effie Phillips:

You will get this Unleashing the Potential of Renewable Energy in India (World Bank Studies) by check out the bookstore or Mall. Merely viewing or reviewing it might to be your solve problem if you get difficulties on your knowledge. Kinds of this guide are various. Not only by simply written or printed but additionally can you enjoy this book through e-book. In the modern era just like now, you just looking of your mobile phone and searching what their problem. Right now, choose your own ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose suitable ways for you.

Pete Plaisance:

As a scholar exactly feel bored to be able to reading. If their teacher asked them to go to the library or even make summary for some reserve, they are complained. Just small students that has reading's soul or real their interest. They just do what the instructor want, like asked to go to the library. They go to presently there but nothing reading significantly. Any students feel that reading through is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this Unleashing the Potential of Renewable Energy in India (World Bank

Studies) can make you experience more interested to read.
