Introduction to Compiler Construction in a Java World

Bill Campbell, Swami Iyer, Bahar Akbal-Delibas

Introduction to Compiler Construction in a Java World Bill Campbell, Swami Iyer, Bahar Akbal-Delibas

Immersing students in Java and the Java Virtual Machine (JVM), **Introduction to Compiler Construction in a Java World** enables a deep understanding of the Java programming language and its implementation. The text focuses on design, organization, and testing, helping students learn good software engineering skills and become better programmers.

The book covers all of the standard compiler topics, including lexical analysis, parsing, abstract syntax trees, semantic analysis, code generation, and register allocation. The authors also demonstrate how JVM code can be translated to a register machine, specifically the MIPS architecture. In addition, they discuss recent strategies, such as just-in-time compiling and hotspot compiling, and present an overview of leading commercial compilers. Each chapter includes a mix of written exercises and programming projects.

By working with and extending a real, functional compiler, students develop a hands-on appreciation of how compilers work, how to write compilers, and how the Java language behaves. They also get invaluable practice working with a non-trivial Java program of more than 30,000 lines of code. Fully documented Java code for the compiler is accessible at <http://www.cs.umb.edu/j--/>

From reader reviews:

Gregory Jones:

Book is to be different for each grade. Book for children right up until adult are different content. As we know that book is very important usually. The book Introduction to Compiler Construction in a Java World had been making you to know about other expertise and of course you can take more information. It is quite advantages for you. The book Introduction to Compiler Construction in a Java World is not only giving you far more new information but also to get your friend when you feel bored. You can spend your spend time to read your book. Try to make relationship using the book Introduction to Compiler Construction in a Java World. You never really feel lose out for everything should you read some books.

Brian Street:

Now a day those who Living in the era wherever everything reachable by connect with the internet and the resources within it can be true or not require people to be aware of each data they get. How people have to be smart in obtaining any information nowadays? Of course the answer then is reading a book. Examining a book can help individuals out of this uncertainty Information specially this Introduction to Compiler Construction in a Java World book since this book offers you rich facts and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it everbody knows.

Marie Avis:

Your reading 6th sense will not betray anyone, why because this Introduction to Compiler Construction in a Java World guide written by well-known writer whose to say well how to make book which can be understand by anyone who read the book. Written inside good manner for you, dripping every ideas and writing skill only for eliminate your own personal hunger then you still doubt Introduction to Compiler Construction in a Java World as good book not just by the cover but also from the content. This is one publication that can break don't assess book by its handle, so do you still needing yet another sixth sense to pick this!? Oh come on your examining sixth sense already told you so why you have to listening to yet another sixth sense.

Leonard Bartow:

As we know that book is important thing to add our knowledge for everything. By a book we can know everything we want. A book is a pair of written, printed, illustrated or blank sheet. Every year was exactly added. This guide Introduction to Compiler Construction in a Java World was filled concerning science. Spend your spare time to add your knowledge about your scientific disciplines competence. Some people has different feel when they reading some sort of book. If you know how big benefit from a book, you can truly feel enjoy to read a publication. In the modern era like at this point, many ways to get book which you wanted.
