It gives a framework of knowledge that allows engineers and technicians to develop an interdisciplinary understanding and integrated approach to engineering. This second edition has been updated and expanded to provide greater depth of coverage. It is split into five main sections: basic system elements, actuation, system models, basic digital principles, and microprocessor systems. It concludes with a chapter on design, design solutions and case studies. "Mechatronics" is essential reading for all HNC/HND and undergraduate students studying mechatronics. It covers the BTEC Mechatronics A and B Units (1413G and 1414G) and also provides the depth of coverage required for undergraduate courses.
