Projective Differential Geometry of Submanifolds, Volume 49 (North-Holland Mathematical Library)

M.A. Akivis, V.V. Goldberg

In this book, the general theory of submanifolds in a multidimensional projective space is constructed. The topics dealt with include osculating spaces and fundamental forms of different orders, asymptotic and conjugate lines, submanifolds on the Grassmannians, different aspects of the normalization problems for submanifolds (with special emphasis given to a connection in the normal bundle) and the problem of algebraizability for different kinds of submanifolds, the geometry of hypersurfaces and hyperbands, etc. A series of special types of submanifolds with special projective structures are studied: submanifolds carrying a net of conjugate lines (in particular, conjugate systems), tangentially degenerate submanifolds, submanifolds with asymptotic and conjugate distributions etc. The method of moving frames and the apparatus of exterior differential forms are systematically used in the book and the results presented can be applied to the problems dealing with the linear subspaces or their generalizations.

Graduate students majoring in differential geometry will find this monograph of great interest, as will researchers in differential and algebraic geometry, complex analysis and theory of several complex variables.

From reader reviews:

Ken Martin:

With other case, little men and women like to read book Projective Differential Geometry of Submanifolds, Volume 49 (North-Holland Mathematical Library). You can choose the best book if you want reading a book. Provided that we know about how is important any book Projective Differential Geometry of Submanifolds, Volume 49 (North-Holland Mathematical Library). You can add expertise and of course you can around the world by way of a book. Absolutely right, simply because from book you can understand everything! From your country until foreign or abroad you will be known. About simple matter until wonderful thing you could know that. In this era, we can open a book or perhaps searching by internet unit. It is called e-book. You should use it when you feel bored to go to the library. Let's examine.

Anthony Wood:

What do you in relation to book? It is not important along? Or just adding material when you need something to explain what the one you have problem? How about your extra time? Or are you busy particular person? If you don't have spare time to try and do others business, it is make one feel bored faster. And you have extra time? What did you do? Every individual has many questions above. They need to answer that question mainly because just their can do this. It said that about publication. Book is familiar in each person. Yes, it is right. Because start from on jardín de infancia until university need this Projective Differential Geometry of Submanifolds, Volume 49 (North-Holland Mathematical Library) to read.

Carlos McNerney:

Reading can called mind hangout, why? Because when you are reading a book mainly book entitled Projective Differential Geometry of Submanifolds, Volume 49 (North-Holland Mathematical Library) your brain will drift away trough every dimension, wandering in most aspect that maybe unknown for but surely might be your mind friends. Imaging just about every word written in a e-book then become one contact form conclusion and explanation in which maybe you never get prior to. The Projective Differential Geometry of Submanifolds, Volume 49 (North-Holland Mathematical Library) giving you another experience more than blown away your mind but also giving you useful details for your better life in this particular era. So now let us teach you the relaxing pattern is your body and mind will likely be pleased when you are finished reading through it, like winning a. Do you want to try this extraordinary spending spare time activity?

Beverly Rosa:

Projective Differential Geometry of Submanifolds, Volume 49 (North-Holland Mathematical Library) can be one of your starter books that are good idea. All of us recommend that straight away because this e-book has good vocabulary that could increase your knowledge in words, easy to understand, bit entertaining but nonetheless delivering the information. The writer giving his/her effort to get every word into delight

arrangement in writing Projective Differential Geometry of Submanifolds, Volume 49 (North-Holland Mathematical Library) but doesn't forget the main stage, giving the reader the hottest along with based confirm resource facts that maybe you can be considered one of it. This great information can certainly drawn you into new stage of crucial imagining.
