## **How to Perform a Transthoracic Echocardiographic Study Volume 1 (How to Perform a Transthoracic Echocardiographic Study)** The American Society of Echocardiography

The cardiac anatomy section visualizes relationships of the heart, ribs, axis of the heart, planes of the heart and aorta, chambers, valves and annuli, and blood flow through the heart. The transducer position menu allows the user to view the anatomical landmarks and the transducer positions for left parasternal, apical, subcostal, suprasternal and right parasternal image acquisition. The views and imaging menu allows the user to navigate from a particular transducer position menu such as left parasternal long to specific images acquired within that window such as PLAX high depth, PLAX low depth, and PLAX Zoom of the Aortic and Mitral Valves. Each animated loop shows a finder image in the upper left that depicts the transducer position, an illustration of the sectional anatomy of the heart on the left, and the echo image with labels on the right. This DVD's content consists of two sections as follows: Section 1: Heart Anatomy 1.1 Heart and Ribs 1.2 Axis of the Heart 1.3 Planes of the Heart 1.4 Chambers 1.5 Valves and Annuli 1.6 Blood Flow Section 2: Basic Transthoracic Echocardiography 2.1 Left Parasternal Long (PLAX) 2.2 Left Parasternal Short (PSAX) 2.3 Apical 2.4 Subcostal 2.5 Suprasternal
