BRS Microbiology Flash Cards (Board Review Series) Todd Swanson, Sandra I. Kim

This set of 250 double-sided cards is intended to accompany Johnson's BRS Microbiology and Immunology, Fourth Edition. The cards consist of a straightforward series of questions and answers intended to help students enrolled in basic science courses and studying for USMLE Step One. Utilising a short phrase that triggers the recall of an answer, each card asks students to commit a key point to memory before moving on to the next card. In addition, they offer a unique advantage to the student by emphasising the important details, rather than giving equal weight to all information about an organism. **FEATURES:** - The front of every card has a notable clinical description or characteristic unique to or indicative of a particular microbial pathogen. - The back of every card is divided into two parts: the top part identifies the microbial pathogen, and the bottom part denote further significant clinical or descriptive aspects. - Unique, quick, and easy to use. Allows student to cover significant points in an entire section in a matter of minutes by selecting only relevant information
