In Search of the Self

Donald G. Oakley

In Search of the Self Donald G. Oakley

In this expansive work, written for a general audience, award-winning former newspaper columnist Donald G. Oakley ventures a layman's exploration of the burgeoning field known as consciousness studies. Inspired initially by the imaginative scenarios of science fiction writers and the thought experiments of prominent philosophers, Oakley traces the evolution of our understanding of the human brain and the physical basis of the sense of the self, as revealed by both historical and current discoveries in the science of neurology. From research into the neurological basis of consciousness, to the feasibility of copying one's personality into a silicon chip, to the more and more refined methods of reading thought processes in the brain, to a critical examination of popular beliefs about the nature of the self and its ultimate destiny after the death of the body, *In Search of the Self* is flavored throughout with the author's original thinking and commonsensical approach. Endnotes after each chapter not only provide documentation for references in the text but add information and comment that enliven the entire book.

From reader reviews:

Louis Vasquez:

Exactly why? Because this In Search of the Self is an unordinary book that the inside of the reserve waiting for you to snap it but latter it will surprise you with the secret this inside. Reading this book adjacent to it was fantastic author who all write the book in such wonderful way makes the content interior easier to understand, entertaining way but still convey the meaning completely. So , it is good for you for not hesitating having this nowadays or you going to regret it. This book will give you a lot of benefits than the other book get such as help improving your ability and your critical thinking technique. So , still want to hesitate having that book? If I have been you I will go to the guide store hurriedly.

Angel Sherrill:

Playing with family in the park, coming to see the water world or hanging out with buddies is thing that usually you may have done when you have spare time, subsequently why you don't try point that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love In Search of the Self, you could enjoy both. It is excellent combination right, you still would like to miss it? What kind of hang type is it? Oh come on its mind hangout guys. What? Still don't get it, oh come on its called reading friends.

David Briggs:

Reading a book to become new life style in this year; every people loves to go through a book. When you read a book you can get a wide range of benefit. When you read publications, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what sorts of book that you have read. In order to get information about your research, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, such as novel, comics, and also soon. The In Search of the Self will give you a new experience in reading through a book.

Stephen Morgan:

Do you like reading a guide? Confuse to looking for your chosen book? Or your book has been rare? Why so many problem for the book? But any people feel that they enjoy with regard to reading. Some people likes studying, not only science book but novel and In Search of the Self or perhaps others sources were given know-how for you. After you know how the truly amazing a book, you feel need to read more and more. Science reserve was created for teacher or perhaps students especially. Those publications are helping them to increase their knowledge. In additional case, beside science guide, any other book likes In Search of the Self to make your spare time considerably more colorful. Many types of book like this.
